

How to Play: Level Walkthrough

Welcome to the game! In this level, you play as Ellen, and your goal is to navigate the dangerous terrain to secure the final prize. Read the guide below to understand your objectives, the hazards in your way, and how to survive.

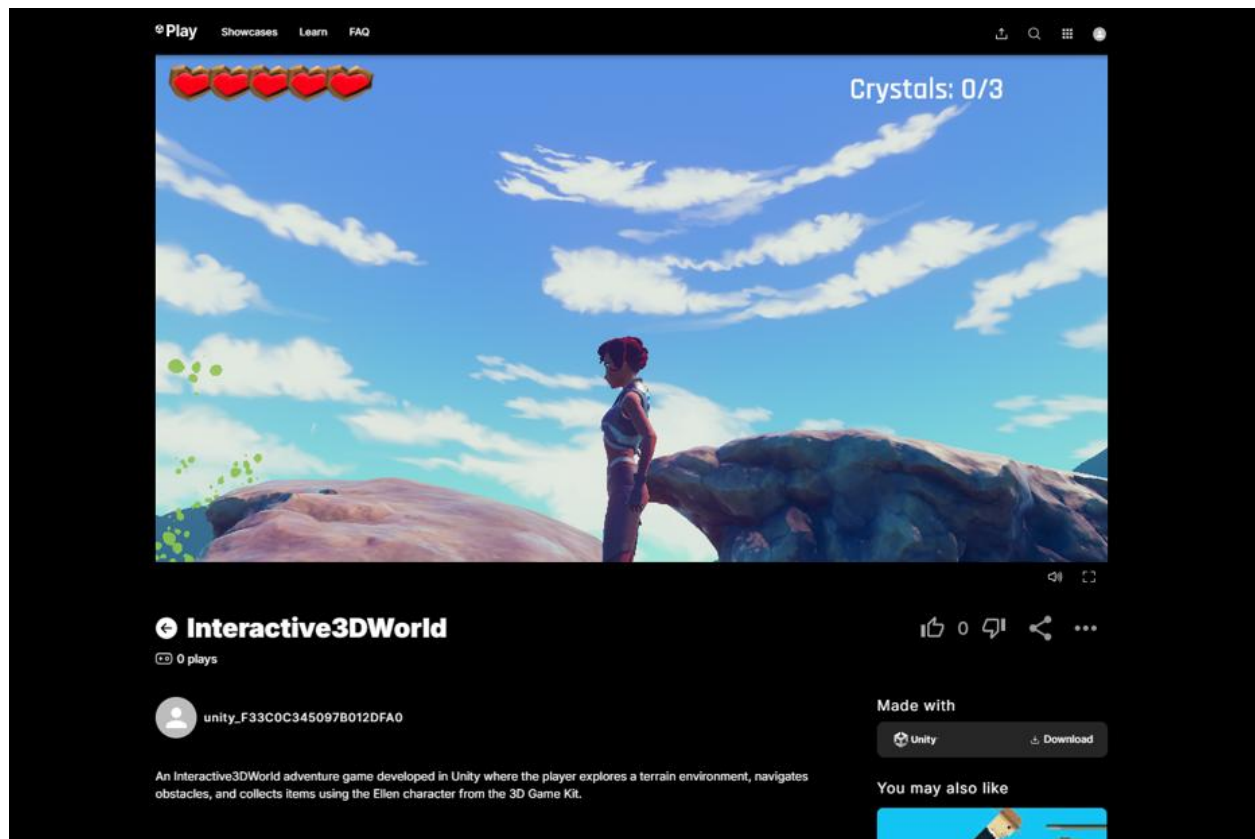

▶ Getting Started

The adventure begins at the main screen.

You can also play the game online through the following Unity Play link.

<https://play.unity.com/en/games/cc321cdf-56b6-439d-aafb-2b7d607ed6fe/interactive3dworld>

Controls

- Movement: Use the standard W, A, S, D keys to move Ellen.
- Camera: Move the mouse to look around the environment. This is key to exploring the area and discovering the safest routes.
- Attack: Press the left mouse button to use Ellen's staff. This is your primary way to defend yourself.
- Pause: Press the Escape key to open the Pause Menu.

🎯 Main Objective

Your ultimate goal is to safely cross the map and collect 3 crystals to win the level!

👉 Step-by-Step Guide

Follow this sequence to successfully clear the map:

1. Trigger the Pressure Pad: Locate the stone pressure pad with the glowing ring and step on it.
2. Wait for the Platform: Activating the pressure pad will trigger the mossy moving platform.
3. Cross the Acid Pool: Carefully time your jump onto the moving platform so you can safely ride it across the bubbling green acid pool.
4. Collect 3 Crystals: Once you make it to the other side, explore the area to find and collect the 3 glowing pink crystals.
5. You Win! Gather all the crystals to successfully complete the level!

▮ Pause Menu

If you need to take a break or restart, you can press the Escape key at any time to bring up the pause menu. From here, you can access options, restart the level, or quit the game.

When playing the WebGL version through Unity Play, please be aware of the following browser-related behaviors:

- **Click to Activate:** Before using any keyboard controls such as the arrow keys or spacebar, you must first click anywhere on the game screen. This is required by all browsers to grant keyboard focus to the game.
- **Quit Button:** The Quit button in the Pause Menu is disabled in the WebGL version. This is a browser security restriction that prevents web applications from closing browser tabs. To replay the game, use the **Restart Level** button instead.
- **Browser Compatibility:** For the best experience, it is recommended to use the latest version of **Google Chrome** or **Mozilla Firefox**. Some features or visual quality may vary depending on your browser type and version.
- **Recommended Alternative:** For the full experience including the working Quit button and best visual quality, please use the **Windows build** included in the submission zip file.

Enemies & Hazards

Keep an eye out for these dangers while you explore:

- The Acid Pool: This toxic green pool covers the center of the map. Do not fall in! Always use the moving platform to get across.
- Chomper Enemies: These aggressive purple monsters are guarding the area. To defeat them, press the left mouse button to attack with Ellen's staff.

Helpful Items

- Health Boxes: If you take damage from a Chomper, look for the stone chests with the glowing green circle. Opening these will restore your health.
- Checkpoints: Look for the glowing yellow crystal on the ground. Be sure to step on it to save your progress so you don't have to start from the beginning if you lose all your health.
